Experience the life of luxury and performance with Self-charging Hybrid Electric Technology that makes it the **King of Sedans**. Discover the 10th Generation Camry.

## ZERO TO ZOOM IN SECONDS

Hybrid Electric Technology with the power of 2AR-FE generated by electric motor and 2.5L Dynamic Force Engine of gasoline with 151 HP for hybrid.

2.5 LITRE DYNAMIC FORCE ENGINE

## EXHILARATING POWER AND PERFORMANCE

### RESPONSIVE POWER

The Camry with charging hybrid electric technology works in total synergy to deliver responsive power and smooth acceleration. Hybrid mode is a more responsive hybrid electric, when you need it.

### QUIETER DRIVE

Compared to conventional cars, the Camry can be more quiet and smooth. Hybrid mode is a near-silent driving experience and at absolutely no cost to fuel economy.

### LOWER EMISSIONS

The Camry produces up to 2 times lower CO2 emissions than conventional cars at the same cost.

### UNMATCHED FUEL EFFICIENCY

Intelligently designed with 5 power modes, Hybrid Electric Technology makes it 2 times more fuel efficient.

### NO CHARGING INFRA REQUIRED

When the battery does run low, excess power from the engine is used to charge the battery keeping you going. Plus, the actual car braking recycles energy to charge the battery, wasting nothing.

## TNGA Toyota New Global Architecture

In concern search for improvements, TNGA aims to achieve the fundamental performance, quality to achieve the ultimate driving experience, setting the pace and the vehicle.

### EXPERIENCE TOYOTA NEW GLOBAL ARCHITECTURE

Natural-feeling styling and a sedan package that provides an interior space that is just right in all ways.

Low hood for forward visibility provides ease of driving and a sense of security. Low center of gravity provides leading fuel economy and acceleration performance.

Outstanding driving performance with a fully direct feel provides a high-quality ride through a combination of a rigid body and a high-response suspension with class-leading levels of quietness.

Center of gravity Front: Rear: 53:47

Low center of gravity Front: Rear: 53:47
